

# Improving Your Pet's Gut Health

The gut is your pet's first barrier to fend off diseases and health issues, so guard it right for better overall health.

Stress, poor diet, food intolerance, illnesses and medication can upset the balance of your pet's gut microflora, which in turn leads to a weakened digestion, impaired absorption of essential nutrients and a compromised immune system. The good news is: you can keep your pet's gut in tip-top shape with prebiotics and probiotics.

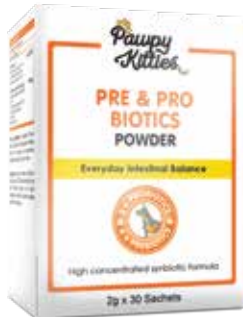

**Pawpy Kitties® Pre & Pro Biotics Powder** which is formulated to deliver a symbiotic combination of 3 patented live and active bacteria along with prebiotics (the preferred food source of the gut's beneficial microflora). This combination helps to:

- ✓ Restore and maintain a healthy digestive system.
- ✓ Increase the absorption of essential nutrients.
- ✓ Support optimal intestinal functions.
- ✓ Enhance your pet's natural immune system.
- ✓ Protect against infections.
- ✓ Eliminate smelly stools.

For pets with fussier palates or those fed on canned pet food, the **flavour-free Pawpy Kitties® Pre & Pro Biotics Powder** delivers the same health benefits but without the additional flavour of the first formula. Simply sprinkle the flavour-free formula onto their favourite food, or mix with cold or room-temperature water, juices or milk.

For Immunity & Digestive Health

Puppies, kittens and small animals need all the nutritional boost they can for healthier growth and **Pawpy Kitties® Seaweed-Cal & Probiotics Powder** is a unique multi-tasking formula that packs an excellent 4-in-1 formula for healthy bones, strong immune system and better digestive system.

A favourite with many pet lovers, it combines 100% organic seaweed calcium harvested from Ireland's pristine Atlantic waters with 3 patented strains of probiotics from Japan to benefit your pet's bone, immune and digestive health. Compared to inorganic sources, this organic, marine vegetative calcium has better bioavailability and is easily absorbed by the body.

And that's not all. The synergistic combination of unique probiotics flushes out bad bacteria and replaces the body with good ones, which then produce immune system-stimulating agents to enhance the body's immunity naturally.

Simply sprinkle on top of your pet's favourite food or mix with water, juices or milk (avoid mixing with warm or hot liquids). For dry food, sprinkle with some water. Suitable for all breeds of dogs, cats and small animals.

For Growth & Bone Health

## About Pawpy Kitties®

Formulated by the region's leading manufacturer of pet nutritional supplements, **Pawpy Kitties®** is committed to provide the pet and veterinary industry with unique and efficacious pet supplements. **Pawpy Kitties®** range of pet supplements cover the most sought-after healthcare needs of your furkids to ensure a better quality of life for them. In addition to oral supplements for targeted conditions and general health maintenance, our wide range of pet supplements also include topical care products that treat and relieve various skin conditions such as ringworms, hot spots and various skin infections as well as cuts, wounds, abrasions, blisters, bites and the like.
